How to notify American Airlines

ATTO folding mobility scooter · Lithium-ion battery 48V / 5.2Ah / 249.6Wh · Battery model GD009-13S2P · Meets IATA requirements

What is in this file: this page · flight day page · notification letter · manufacturer letter · battery certificates (MSDS and UN 38.3)
To print: pages 1 to 3 are enough. Keep the whole file on your phone to show the certificates if asked.

1 What we filled in for you

- Your full name, booking reference, flights and dates, phone and email
- Your signature and the date, on the notification letter (page 3)

2 Notify American Airlines

- Tell American Airlines Special Assistance about your scooter. On aa.com, open Contact American, then Special Assistance
- Ask them to confirm that your battery type is approved for travel. Share the battery details from this file: lithium-ion, removable, 249.6 Wh
- American says collapsible devices can be stored overhead or under your seat. Ask what applies to your scooter

⏱ **When: As early as possible. American gives no fixed notice period**

⚠ For flights on or after March 31, 2027, American requires the battery to have a manufacturer label that states its type. Check your battery label before you fly.

3 On flight day

- Bring this file printed, and keep it on your phone
- At check-in, tell the agent you have a folding mobility scooter with a lithium battery
- Fold the scooter and switch it off. Take out the battery and carry it in your hand luggage

* Helper tool only. The file was created automatically from the details you entered and may contain mistakes or omissions. You are responsible for checking the details, completing any missing document and sending it to the airline. MovingLife is not responsible in any way for an error, omission, refusal, delay or requirement of an airline or an airport, and no claim may be made against it. The final decision belongs to the airline only.

Flight day ✈

1. Arrive at the airport early. Many airlines ask for at least 2 hours before a domestic flight, so check yours
2. Bring **this file** printed, and keep it on your phone
3. At check-in, tell the agent you have a **folding mobility scooter** with a lithium battery
4. **Fold** the scooter and **switch it off**
5. **Take out the battery**. It flies with you in your hand luggage
6. Keep the scooter **charger** in your hand luggage, not in your checked bag
7. Have a flight kit? **Put it on** the scooter before you hand it over
8. If asked, show the **manufacturer letter** and the **battery certificates** (page 4 and on)

Fold to trolley mode

Take out the battery and carry it with you

Your rights. Airlines flying to and from the US must help you with boarding and with your mobility device, at no charge. If a problem comes up, ask for the airline's Complaints Resolution Official.

We recommend flying with the ATTO flight kit
A protective cover that keeps the scooter safe while it is loaded onto the plane.

Powered Mobility Device Notification

To: American Airlines, Special Assistance / Accessibility Services · Please keep with the booking · Device: ATTO folding mobility scooter by Movinglife LTD

> **Request:** I will travel with the battery powered mobility device described below. Please note it on my reservation (battery powered mobility aid with a lithium-ion battery, WCLB) and tell me about any additional requirement.

Passenger and flight	
Full name (as in the passport)	
Booking reference	
Flight numbers and dates	
Phone / Email	

Mobility device	
Device type	**Electric folding mobility scooter**
Manufacturer / model	**Movinglife LTD · ATTO**
Weight	**28.2 kg (62 lb) without battery · battery 1.8 kg (4 lb)**
Folded dimensions (L × W × H)	**39 × 42 × 72 cm (15.4 × 16.5 × 28.3 in)**
Unfolded dimensions (L × W × H)	**120 × 56 × 89 cm (47.2 × 22 × 35 in)**
Tools needed to prepare for flight?	**No**

Battery	
Battery type	**Lithium-ion, dry, non-spillable**
Number of batteries	**1 · spare batteries: 0**
Voltage / capacity / energy	**48V / 5.2Ah / 249.6 Wh**
Battery model / manufacturer	**GD009-13S2P · Dongguan Kingin Power Co., Ltd**
Test standard	**UN 38.3 · report MRI1AVBG2672847U5**
Air transport	**Meets IATA DGR requirements**
Removable / can be disconnected / original manufacturer battery	**Yes / Yes / Yes**

Preparation for flight

- Fold to trolley mode, power OFF at the tiller.
- Remove the lithium-ion battery and carry it in the cabin in a protective pouch, with the terminals protected against short circuit.
- The charger travels with the passenger, not in checked baggage.

Attached documents

- Manufacturer's air transport confirmation letter
- Battery safety data sheet (MSDS) and UN 38.3 summary
- Battery spec and label (including Wh)
- Manufacturer's manual (bring it to the airport)

Passenger signature _____ Date _____

I declare that the details above are correct and match the device I will travel with.

Subject: Air Transport Confirmation, ATTO Mobility Scooter and Lithium ion Battery

This letter confirms that the mobility device described below is a battery-powered mobility aid manufactured / supplied by Movinglife LTD, and that its battery meets the requirements for carriage by air as a passenger mobility aid.

Device	**ATTO electric folding mobility scooter**
Manufacturer	**Movinglife LTD**
Weight / folded dimensions	**28.2 kg without battery (battery 1.8 kg) · 39 × 42 × 72 cm (L×W×H)**
Battery type	**Lithium-ion, removable, original manufacturer battery**
Battery model / manufacturer	**GD009-13S2P · Dongguan Kingin Power Co., Ltd**
Rating	**48V · 5.2Ah · 249.6 Wh (one battery)**
Testing	**UN Manual of Tests and Criteria, Part III, sub-section 38.3 (UN 38.3) · report MRI1AVBG2672847U5**

Transport instructions: fold the scooter into trolley mode and switch it off. Remove the lithium-ion battery (249.6 Wh, in accordance with the IATA Dangerous Goods Regulations for battery-powered mobility aids) and carry it in the passenger cabin, with the terminals protected against short circuit and the battery placed in a protective pouch. No tools are required. The scooter frame contains no other battery.

The battery's Material Safety Data Sheet (MSDS), including the UN 38.3 transport information, is attached (ATTO Flight Safety Certificates).
