How to send it to Blue Bird

ATTO mobility scooter · lithium battery 48V / 5.2Ah / 249.6Wh · battery model GD009-13S2P · meets IATA requirements

What is in this file: this page · a page for flight day · the airline form · manufacturer letter · battery approvals (MSDS and UN 38.3)

1 What to fill in on the form

- Full name, outbound and return flights and dates
- Details of travel insurance that covers the scooter (required by the form)
- 4 photos: the scooter, the manufacturer label on the battery, the whole battery and the battery connections

2 Send to the airline

- Send the file, the instruction manual and the photos to **pax@bluebirdair.com** and also to **bookings@BlueBirdair.com**

⏱ **When: At least 14 days before the flight (the form says 72 hours, their website says 14 days)**

3 On the day of the flight

- Arrive at check-in 3 hours before the flight. At the counter you will be asked to sign a Limited Release form, and that is normal
- Bring the file printed
- At the counter fold the scooter, switch it off and take out the battery
- The battery goes on the plane with you in your hand luggage, with the contacts covered

* A helper and accessibility tool only. The file was prepared automatically from the details entered and may contain mistakes or omissions. The user alone is responsible for checking the details, completing any missing document and sending it to the airline. MovingLife is not responsible in any way for any mistake, omission, refusal, delay or requirement of the airline or the airport, and no claim will be made against it. The final decision is the airline's alone.

blueBird Airways movinglife

On flight day ✈

1. Arrive at the airport **3 hours before the flight**
2. Bring **this file** printed
3. At the counter **fold** the scooter and **switch it off**
4. **Take out the battery.** It goes on the plane with you in your hand luggage
5. Take the scooter **charger** in your hand luggage, not in the suitcase
6. Have a flight kit? **Put it on** the scooter before handing it over
7. If they ask, show the **manufacturer letter** and the **flight approvals**

Fold to trolley mode

Take out the battery and take it in your hand luggage

We recommend flying with the ATTO flight kit

A protective cover that protects the scooter while it is loaded onto the plane.

To: Airline Check-in / Dangerous Goods Acceptance Staff

Subject: Air Transport Confirmation, ATTO Mobility Scooter and Lithium ion Battery

This letter confirms that the mobility device described below is a battery-powered mobility aid manufactured / supplied by Movinglife LTD, and that its battery meets the requirements for carriage by air as a passenger mobility aid.

Device	**ATTO electric folding mobility scooter**
Manufacturer	**Movinglife LTD**
Weight / folded dimensions	**28.2 kg without battery (battery 1.8 kg) · 39 × 42 × 72 cm (L×W×H)**
Battery type	**Lithium-ion, removable, original manufacturer battery**
Battery model / manufacturer	**GD009-13S2P · Dongguan Kingin Power Co., Ltd**
Rating	**48V · 5.2Ah · 249.6 Wh (one battery)**
Testing	**UN Manual of Tests and Criteria, Part III, sub-section 38.3 (UN 38.3) · report MRI1AVBG2672847U5**

Transport instructions: fold the scooter into trolley mode and switch it off. Remove the lithium-ion battery (249.6 Wh, in accordance with the IATA Dangerous Goods Regulations for battery-powered mobility aids) and carry it in the passenger cabin, with the terminals protected against short circuit and the battery placed in a protective pouch. No tools are required. The scooter frame contains no other battery.

The battery's Material Safety Data Sheet (MSDS), including the UN 38.3 transport information, is attached (ATTO Flight Safety Certificates).
