How to send it to flydubai

ATTO mobility scooter · lithium battery 48V / 5.2Ah / 249.6Wh · battery model GD009-13S2P · meets IATA requirements

What is in this file: this page · a page for flight day · the airline form · manufacturer letter · battery approvals (MSDS and UN 38.3)

1 What to fill in on the form

- Name, booking number, mobile phone, route, flight number and date

2 Send to the airline

- Email the file to **letstalk@flydubai.com**

⏱ **When: At least 48 hours before the flight**

⚠ flydubai has suspended flights to Israel in the past. Make sure your flight is operating

3 On the day of the flight

- Bring the file printed
- At the counter fold the scooter, switch it off and take out the battery
- The battery goes on the plane with you in your hand luggage, with the contacts covered

* A helper and accessibility tool only. The file was prepared automatically from the details entered and may contain mistakes or omissions. The user alone is responsible for checking the details, completing any missing document and sending it to the airline. MovingLife is not responsible in any way for any mistake, omission, refusal, delay or requirement of the airline or the airport, and no claim will be made against it. The final decision is the airline's alone.

flydubai · movinglife

On flight day ✈

1. Arrive at the airport **3 hours before the flight**
2. Bring **this file** printed
3. At the counter **fold** the scooter and **switch it off**
4. **Take out the battery.** It goes on the plane with you in your hand luggage
5. Take the scooter **charger** in your hand luggage, not in the suitcase
6. Have a flight kit? **Put it on** the scooter before handing it over
7. If they ask, show the **manufacturer letter** and the **flight approvals**

Fold to trolley mode

Take out the battery and take it in your hand luggage

We recommend flying with the ATTO flight kit

A protective cover that protects the scooter while it is loaded onto the plane.

To order: **073 391 3999** · Details: movinglife.co.il/products/atto-flight-kit

Wheelchair and mobility aid information

Please download, fill out, and email this form to **letstalk@flydubai.com** 48 hours before departure.

PASSENGER INFORMATION	
Passenger name:	Booking reference: (e.g., 4XCKT2)
Mobile no.:	Route: (e.g., DXB-DOH-DXB)
Alternate mobile no.:	Flight no. & Date:

WHEELCHAIR/MOBILITY AID INFORMATION		
Manufacturer: Movinglife LTD	Model no.: ATTO	Weight (kg): 28.2
Dimensions (cm): Length: 39 (folded)	Width: 42 (folded)	Height: 72 (folded)

☑ Foldable ☐ Non-foldable

- Wheelchairs that exceed maximum dimensions or weight might not be accepted for carriage.
- All removable parts must be properly secured during transport.

BATTERY

WHEELCHAIR/MOBILITY AID

Number of batteries required to operate the wheelchair / mobility aid: 1

Battery Type:

☐ Lithium-ion (will remain installed)[1]
☑ Lithium-ion (will be removed)[2]
☐ Wet-cell non-spillable (will remain installed)[1]
☐ Dry-cell non-spillable (will remain installed)[1]
☐ Dry-cell non-spillable (will be removed)[3]

[1]If the battery remains installed, the power source must be disconnected and insulated. (e.g., the key turned off and removed, securing the power switch to the "Off" position, or a quick disconnection of controls).
[2]If the lithium-ion battery is removed, it must be packed in a protective pouch/container and carried only in the cabin.
[3]If the dry-cell non-spillable battery is removed, it must be packed in a strong rigid packaging and carried only in the cargo hold.

Battery power:

Watt-hour rating for lithium-ion (Li-ion) batteries: 249.6 Wh

Spare battery (if applicable):

Total number of spare batteries carried: 0

Watt-hour rating for lithium-ion (Li-ion) batteries: N/A (no spare battery)

Other instructions: Fold into trolley mode. Power OFF at tiller, remove battery, carry it in cabin with terminals protected. Unfolded 120x56x89 cm. No tools required.

Batteries: Li-ion 48V/5.2Ah/249.6Wh, GD009-13S2P (Dongguan Kingin Power Co., Ltd), UN38.3 report MRI1AVBG2672847U5

If your itinerary involves travel on another airline, you should check the specific wheelchair conditions of carriage for that carrier before making your booking.

To: Airline Check-in / Dangerous Goods Acceptance Staff

Subject: Air Transport Confirmation, ATTO Mobility Scooter and Lithium ion Battery

This letter confirms that the mobility device described below is a battery-powered mobility aid manufactured / supplied by Movinglife LTD, and that its battery meets the requirements for carriage by air as a passenger mobility aid.

Device	**ATTO electric folding mobility scooter**
Manufacturer	**Movinglife LTD**
Weight / folded dimensions	**28.2 kg without battery (battery 1.8 kg) · 39 × 42 × 72 cm (L×W×H)**
Battery type	**Lithium-ion, removable, original manufacturer battery**
Battery model / manufacturer	**GD009-13S2P · Dongguan Kingin Power Co., Ltd**
Rating	**48V · 5.2Ah · 249.6 Wh (one battery)**
Testing	**UN Manual of Tests and Criteria, Part III, sub-section 38.3 (UN 38.3) · report MRI1AVBG2672847U5**

Transport instructions: fold the scooter into trolley mode and switch it off. Remove the lithium-ion battery (249.6 Wh, in accordance with the IATA Dangerous Goods Regulations for battery-powered mobility aids) and carry it in the passenger cabin, with the terminals protected against short circuit and the battery placed in a protective pouch. No tools are required. The scooter frame contains no other battery.

The battery's Material Safety Data Sheet (MSDS), including the UN 38.3 transport information, is attached (ATTO Flight Safety Certificates).
